

ELECTRIFYING THE PAST FOR THE FUTURE

Electric fan drive retrofit kit

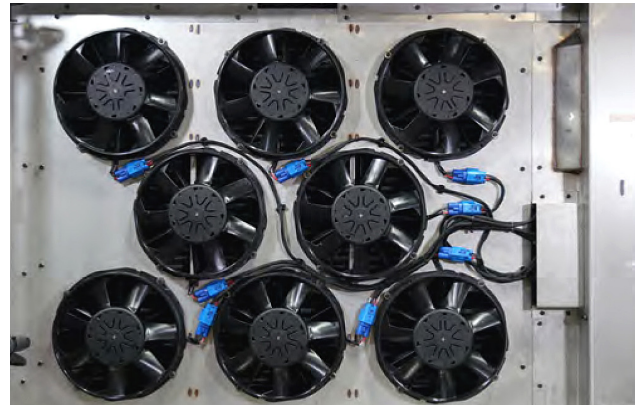

Improve performance, uptime & profitability

Upgrade your system with the reliable electric fan drive allowing you to maintain valuable uptime and avoid costly coach down situations.

- Replaces existing infrastructure – fan, drive shaft, pulley, clutch, gearbox – with the electronic module with dual outputs and an extra alternator for better reliability.
- Promotes improved access for engine and cooling system maintenance.
- Driven by electrical energy instead of the engine belt drive, allows return of up to 20hp giving you more drive power.
- All-weather tested fuse box meets IP66 conditions, ensuring lasting quality to keep you on the road.
