

ELECTRIFYING THE PAST FOR THE FUTURE

Electric fan drive retrofit kit

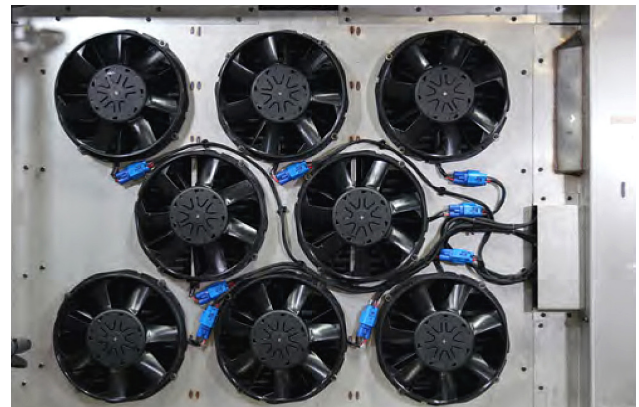

Improve performance & peace of mind

Upgrade your system with the latest technology. The reliable electric fan drive helps keep your vehicle on the road, so you reach all your destinations.

- Driven by electrical energy instead of the engine belt drive, allows return of up to 20hp giving you more drive power
- Replaces existing infrastructure – fan, drive shaft, pulley, clutch, gearbox – with the electronic module with dual outputs and an extra alternator for better reliability
- Promotes improved access for engine and cooling system maintenance
- All-weather tested fuse box meets IP66 conditions, ensuring lasting quality to keep you on the road
- Additional condenser kit required for motorhomes with driver's air only HVAC
