

PREVOST

THE ULTIMATE EXPERIENCE

BEING COOL HAS NEVER BEEN SO HOT

Keep your engine in peak performance by keeping it cool

What are the benefits of a coolant flush?

Coolant flushes remove rust and scale deposits which build up over time and can cause overheating and damage to the cooling system.

- New anti-freeze contains additives which lubricate and extend the life of your engines water pump.
- Additionally, new anti-freeze also helps prevent rust from building up in the water pump, which allows the cooling system to operate more efficiently.
- Over time, as old anti-freeze loses its anti-corrosive properties, contaminants build up in the cooling system. A coolant flush will completely remove these built up particles from the system.
- Old anti-freeze becomes acidic and will break down and damage the bearing in the water pump, the rubber hoses, and the aluminum components of the engine.
- As part of your coolant flush, you receive an inspection of your entire cooling system including the thermostat, radiator and all hoses and belts identifying other potential problems.

COOLANT SYSTEM FLUSH \$1,400 USD / \$1,550 CAD

- Drain coolant and dispose accordingly, use cleaning solvent, flush out coolant system, replace coolant filter, refill with fresh coolant, bleed air from system.
- **Components**
 - Radiator – Ensure your radiator is in peak condition. Have your system pressured tested today. Contact your local Prevost Service Center for details.
 - Antifreeze – Refer to your maintenance manual or contact your local Prevost Service Center for specifications.
 - 22902404 Water Pump
 - 21937327 Coolant Filter
 - 1613426 Thermostat 2
 - 550005, 21528785 Surge tank cap/Pressure Cap

For more pricing details, please contact your parts sales manager, local service center or call center.

Freight is prepaid for all ground shipments. Valid through May 31, 2022.
