MFA Instructions for External Users

A good number of Volvo Group users use MFA already, but in order to increase the security of the identities of all our users, a registration of an MFA method will be necessary.

The purpose of this document is to help our users with this transition by providing a step-by-step guide to enable MFA for user accounts.

2. Close all browser windows and open a new private/incognito browser session (right-click on Microsoft Edge browser icon and select "New InPrivate Window")

MFA-instruktioner för externa användare

ResumID-projektet är i full gång med att leverera en säkrare, effektivare och snabbare IAM-lösning (Identity and Access Management). Vi har nått en punkt där vi behöver aktivt deltagande från våra anställda och dotterbolag för att implementera en ytterligare säkerhetsfunktion - MFA.

Ett stort antal av Volvokoncernens användare använder redan MFA, men för att öka säkerheten för alla våra användares identiteter kommer en registrering av en MFA-metod att vara nödvändig.

Syftet med detta dokument är att hjälpa våra användare med denna övergång genom att tillhandahålla en steg-för-steg-guide för att aktivera MFA för användarkonton.

1. Logga in på ditt system (bärbar dator, stationär dator)

2. Stäng alla webbläsarfönster och öppna en ny privat/incognito webbläsarsession (högerklicka på Microsoft Edge webbläsarikon och välj "Nytt InPrivate-fönster")
