

CLEAN IDLING Q&A

In 2024, CARB enacted guidelines that limit diesel trucks and buses from idling more than 5 minutes in California and opt-in states. An exemption for motorcoaches no longer exists.

What is Clean Idling?

Diesel vehicles using an engine that meets the requirements for Clean Idling (less than 10g/hr of CO) and Low Nox Idling are allowed to idle for more than 5 minutes. Applicable vehicles will have a sticker showing they are compliant with the regulation.

Can I Idle everywhere with that engine?

No, CARB defined some restricted areas where Idling is not allowed.

- Schools
- Homes
- Hospitals
- Senior facilities
- Childcare facilities

Within 100 feet of property line

Can I buy this Sticker?

Yes, the Certified Clean Idle sticker will be available for vehicles using an engine that is compliant with the 2024 Clean Idling requirements. Since the stickers will be VIN related, they will have to be ordered through PrevoSt Parts.
